- Cubed Avo ●●●●●●
- Steamed Vegetable Cubes ●●●●●●
- Grated Cheese ●●●●●●
- Scrambled Eggs ●●●●●●

Baby's FIRST FOODS TRACKING CHART

This chart is designed to help you keep track of what your baby has tried & guide you with lots of foods you can introduce.

Tummies Full of Love has the Tiny Tummy Range to help you start on your journey, but there are lots of foods on the chart that you can try yourself!

Knowing where to start and how to do it can be a bit overwhelming. The truth is there is no right or wrong way. As a first-time mom I found it even more stressful because then how on earth do you know what to do?

If you are conscious about what to give your baby so that they have the best start, but don't know what options are 'healthy' in the shops or you just don't have the time to stand in your kitchen and cook, steam, cool and pack new foods for your baby. Tummies Full of Love is your answer. With all their food containing no sugar, no salt and no preservatives. It's a good nutritious place to start. When starting with solid foods it is recommended to stick to the same thing for three days and then change onto something new. This can get a bit confusing after a few weeks, trying to remember what you have and haven't tried and/ or what else you can experiment with.

Introducing solid foods is one of the most exciting (and messy) moments for you and your baby!
